

Please do not allow the Mexican trucks to come into America. I was a contractor for 30 years in Memphis until I had to either hire illegal workers or do something else. I do not want to change careers again. I am also concerned about the safety and environmental issues. I am not inspected but about twice a year (running almost 200,000 miles per year). How can you assure they are safe when you do not have enough officers to check Americans now.
